Dimensions

Optional Extras

Form temporary/Semi-permanent barriers

Can be manufactured in either mild steel or stainless steel – both from recycled sources

As standard mild steel folding bollards are finished galvanised and stainless steel folding bollards satin brush polished. Polyester Powder coating is also available

As standard the ASF folding bollard is 1000mm high, but can be manufactured to any height 100mm square as standard. Also available in other box and rectangular section sizes

Rubber floor stoppers can be added to protect bollard when folded onto the ground

Reflective Bands are available logo's, signage and coats of arms can be added via laser cut vinyls or in some cases etching and enamelling.
